We've raised the bar. Again.

More lifting power. Higher reach. Improved hydraulic flow. It all adds up to greater on-the-job performance and productivity with the maneuverable new 700 platform from Bobcat – unquestionably one of the most versatile skid-steer loaders you can buy.

The new S750 and S770 models deliver an incredible 11 feet of vertical lift, 23 gpm standard hydraulic flow and 36.5 gpm high flow with 3,500 psi hydraulic relief pressure, giving you the power and reach you need for the most demanding tasks.

Both feature the latest Bobcat Comfort Cab improvements, including cab-forward design, better visibility, a cleaner, quieter pressurized working environment, and optional radio and air suspension seat.

Serviceability improvements include an easier-to-clean cooling system, more efficient hydraulics with an easy-to-read level indicator, and end-greased pins at vital locations. Uptime protection improvements include a redesigned rear bumper and integrated quick couplers to keep you rolling with minimum maintenance time.

NOTE - Where applicable, dimensions are in accordance with Society of Automotive Engineers (SAE) and ISO standards. Specifications and design are subject to change without notice. Pictures of Bobcat units may show other than standard equipment. All dimensions are given for loader equipped with standard tires. All dimensions are shown in inches. Respective metric dimensions are enclosed by parentheses. Bobcat Company complies with the requirements of ISO 9001 as registered with BSI.

The Bobcat Attachments Advantage: Bobcat attachments are engineered and manufactured to fit Bobcat loaders for optimum job performance, dependability and durability.
